

Product Performance & Sales Insights Dashboard

By
Aspiring Data Analyst
Sehrish Khalid

Key Findings

- **Puma Motorsport** is a top brand with the rating of **4.5**.
- **Casual shoes** is the best category averaging a **3.92** rating.
- **Mozafia** shoe is most popular racking up a massive **225** ratings.
- **Sandals** bring in the most premium revenue, with the highest average price of **4,035**.

Sports Shoes Performance

Filtering the dashboard by the **Sports Shoes** category dynamically updates all metrics to reveal its specific performance footprint. This view isolates customer volume, tracking its distinct pricing and rating trends to help management evaluate how our athletic styles compare directly against our casual and premium fashion lines.

Top Product Successes

Our brand health is incredibly strong in specific areas. **Puma Motorsport** leads the entire portfolio with a near-perfect customer rating of **4.5**. Additionally, **Casual Shoes** are our most consistently liked style, holding a **3.92 average rating**, while the **Mozafia** shoe is our biggest crowd-pleaser with a massive **225 customer reviews**.

Interactive View

Slicing the data reveals that while **Casual Shoes** maintain a high **3.92** rating, **Formal Shoes** slump to a **2.74** rating.

Sales Drop-Offs

We have a steady flow of exactly **2 orders** every month all year, but sales suddenly cut in half in **December**. At the same time, we are giving away huge discounts on **Puma shoes** even though customers already love them and would pay full price.

VOLUME

Quick Recommendations

- 1. Cut Puma Discounts:** Slowly lower the discounts on Puma Motorsport. Customers love the quality and will happily pay closer to full price.
- 2. Clear Out Formal Shoes:** Run a clearance sale on formal shoes to get rid of slow-moving stock and talk to suppliers about fixing their low quality.
- 3. Expand Sandals Lineup:** Since sandals command a high price of 4,035, introduce a few cheaper mid-tier options to capture buyers who want the style but can't afford the premium price.
- 4. Prep for the December Drop:** Keep inventory lean between July and November since demand is perfectly flat and run promotional bundles in late November to clear stock before the December sales freeze.

THANK YOU

Thank you for your time and guidance throughout this capstone project and the entire internship cohort. I look forward to taking these data modeling skills into my next professional data analytics chapters.
